# CONCEPT STATEMENT

---

The main focus of our design involves a productive space for students of the Hospitality and Tourism department to study independently or work in groups, while doubling as an entertaining area for any special occasion held by said department. It will take advantage of the abundance of natural light radiating from the sun, while engaging overhead accents to provide adequate shade, ensuring a cool and relaxing environment. As a boxed-in courtyard above ground level, the air is stagnant however open it may be to the sky. As such, this can and will be taken as a directive to incorporate refreshing commodities and inviting elements to what was once was a stale space made new again, for student and faculty alike.
