SECTIONS

PERSPECTIVES

PERSPECTIVES

PERSPECTIVES

SUSTAINABLE DESIGN

Green Roof Benefits

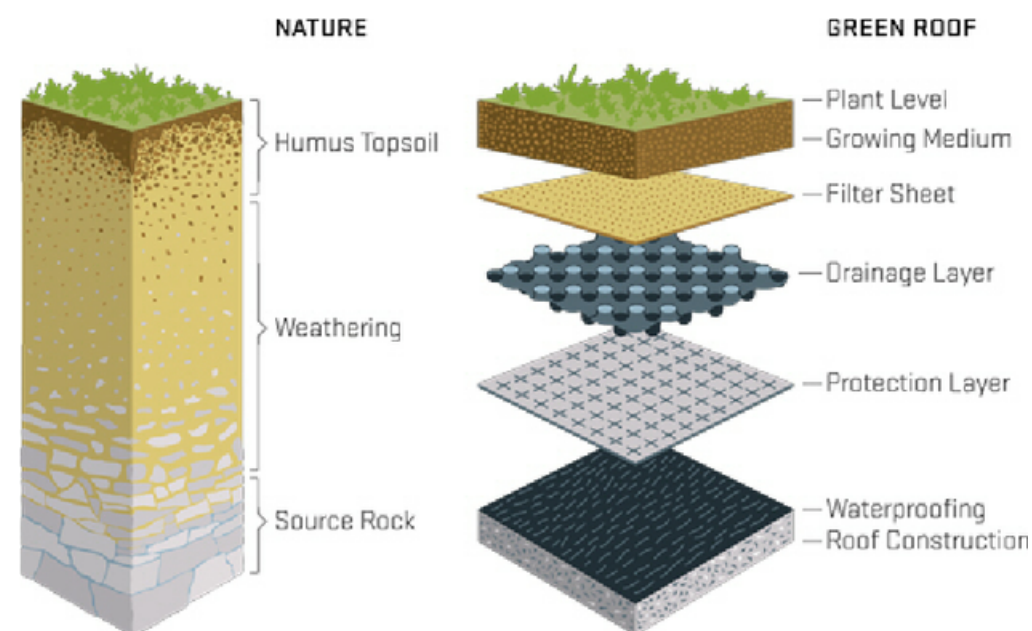

Energy: Reduce building energy use by cooling roofs and providing shading, thermal mass and insulation.

Biodiversity and Habitat: Provide new urban habitat for plants and animals, like birds and insects, thereby increasing biodiversity.

Great for Hot Climates: Significantly reduces the need for air conditioning in summer by reflecting heat from budling, and provides insulation in the winter.

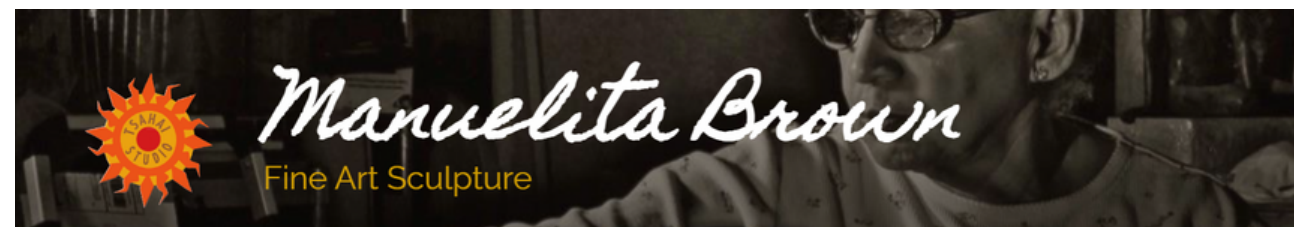

Roof Longevity: Green roofs are expected to last twice as long as conventional roofs

Aesthetics: Adds beauty and value to buildings.

LOCAL ARTISTS / GARDEN SCULPTURE

Manuelita Brown is professional artist and sculptor, is endowed with an exceptional understanding of universal human experiences. She combines this sensitivity with her broad training and innate artistic talent to create artwork frequently described as eclectic and authentically personal.

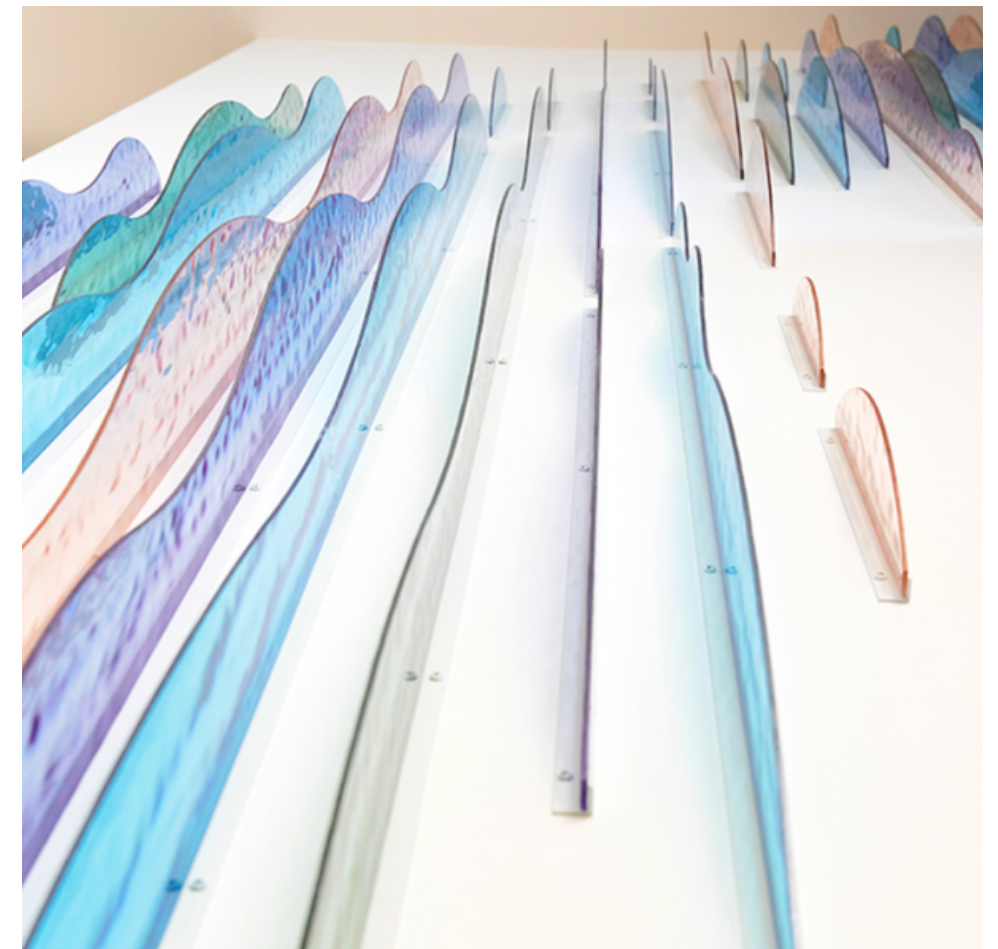

LOCAL ARTISTS / GALLERY EXHIBITIONS

Kaori Fukuyama is a multi-disciplinary artist from Kumamoto, Japan, who lives and works in San Diego, CA. Her practice spans paintings, drawings, sculptures, and site-specific installations that explore the interactions of color, light and shadow.

香 KAORI FUKUYAMA

THANK YOU!
